threats, Dallas

Dear Paul,

2/14/78

On page 10 of the special Freep edition there is a facsimile of the 11/17/63 FBI HQ TT to all SACs. I would appreciate a copy if you have it.

The document itself is new. The content is not. I have that in Coup, and more than this says.

My interest is in what was cropped to make the document larger and more legible. An example is that it has at least another page. Also that the file number is not of one of the released files, although that could have appeared elsewhere and also have been removed in reproduction by Freep. If as it appears 62-0 is the entire file number that also is interesting.

I believe this copy says more than has been appreciated and would like to pursue that.

The Freep article leaves unclear whether or not this Walter copy was ever forwarded to Washington. I can believe that it was not but I want to be sure.

There are some problems with it. Like Debrus for deBrueys, Maynar for Maynard. Or mayner.

For sure there has to have been the kind of TT Walter told Lane about after Lane made a college speech in N.O. I was there right afterward and by then Lane and Garrison had already distorted what Walters said enormously, to make LHO an FBI hero-informant who reported this threat.

There has to be some kind of FBI record of the incident because of the attention it received beginning about late 1967.

Thanks,
